

CAUTION

DRYER SAFETY PREVENT FIRES

- Never put towels, sponges or rags used to clean up industrial chemicals, oil spills (including deep fryer oil), or other flammable liquids in the dryer.
- Oil and chemical residue on towels or rags will start on fire in a dryer.
- **DO NOT** leave oily chemical laden towels, rags or even paper towels in a pile or bunched in a container.
- Oily towels or rags left bunched up will start on fire due to spontaneous combustion.
- Spread out the towels or rags and hang on racks to air dry.
